Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Receipt is acknowledged of the Amendment filed 19 June 2002.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 23 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 23, the limitations set forth in this claim is unclear to the examiner because it is not legible due to a typographical error (see page 5, line 7 of Amendment).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-10, 21, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tarbox (US 5,705,798) in view of Wheeler (GB 2,304,449), cited by the applicant.

Tarbox teaches an ATM machine 101 comprising a user interface including a group of indicators for entering data, each indicator being associated with a pre-defined transaction so that a user may execute a desired transaction by selecting a single indicator; wherein each indicator includes a push button and protrudes from a surface on which the indicator is mounted; and wherein the pre-defined transaction is programmed by a user and/or the owner of the terminal. The user interface also includes an identifier 109 and a dispensing area 111. (See col. 6, line 11 to col. 7, line 61)

Re claims 21 and 22: The ATM machine further comprises a controller means for accepting instructions for allowing *i*) a first user to program a first button to perform a first predetermined function, when later actuated by the first user and *ii*) a second user to program the first button to perform a second predetermined function, different from the first predetermined function, when later actuated by the second user. (See col. 6, line 11 to col. 7, line 61)

Wheeler fails to teach or fairly suggest having indicators of different shapes or colors.

Wheeler teaches a telephone apparatus having push buttons with unique attribute relating to the size and color of the push buttons (see figure 12; col. 1, lines 6-17; col. 3, lines 21-30; and col. 18, lines 17-25). In view of Wheeler's teaching, it would have been obvious to an artisan of ordinary skill in the art at the time the invention was made to employ the notoriously old and well known push button keypad having differently shaped and color push buttons to the teachings of Tarbox to allow a visually

impaired person to easily identify the push buttons when conducting a transaction thus, reducing operation/transaction error made by the visually impaired person.

Furthermore, it would have been obvious to have such indicators in order to make the user interface of the ATM machine aesthetically pleasing to the user.

Response to Arguments

6. Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Foote (US 6,164,853) discloses an ergonomic housing for a handheld device having a plurality keys of different shapes.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Contact Information

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to April A. Nowlin whose telephone number is (703) 605-1219. The examiner can normally be reached on Monday - Friday from 7:30AM - 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Lee can be reached on (703) 305-3503. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-7722 for regular communications and (703) 308-7382 for After Final communications.

Communications via Internet e-mail regarding this application, other than those under 35 U.S.C. 132 or which otherwise require a signature, may be used by the applicant and should be addressed to [april.nowlin@uspto.gov].

All Internet e-mail communications will be made of record in the application file. PTO employees do not engage in Internet communications where there exists a possibility that sensitive information could be identified or exchanged unless the record includes a properly signed express waiver of the confidentiality requirements of 35 U.S.C. 122. This is more clearly set forth in the Interim Internet Usage Policy published in the official Gazette of the Patent and
